## PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of software development experience (including internships), focused on **back-end** and **systems integration**. I work with **JavaScript** and **TypeScript**, **Node.js** (**Express**), **Vue.js**, **React Native** (Expo), **PostgreSQL** and **MongoDB**. Experienced with **REST APIs**, **microservices**, data pipelines (ETL) and integration middleware for ERPs and CRMs (SAP, Winthor, Salesforce), as well as generative AI chatbots (OpenAI) integrated with WhatsApp. On the infrastructure side, I work with **Docker**, **Nginx**, **Linux**, **Git** and **AWS** (EC2); in personal projects, I apply **JWT** authentication and automated testing with **Jest**.

## PROFESSIONAL EXPERIENCE

**Software Developer**
S-Cube | 12/2025 - 10/2026

- Built support, sales and triage chatbots in **Node.js**, integrating the **WhatsApp API** with the **OpenAI API** (generative AI) to deliver dynamic conversation flows.
- Implemented context and conversation history persistence in **PostgreSQL** and automated service deployment with **Docker** via Dokploy.
- Developed a **React Native** mobile app (Expo Router + **TypeScript**) for a client's member and event management.

**Software Developer**
B2List | 09/2024 - 12/2025

- Built and maintained **microservices** and data pipelines (**ETL**) in **Node.js** to ingest and synchronize large volumes of data.
- Developed **APIs** in **Node.js** for the platform's business rules, focusing on performance, quality and code maintainability.

**Software Development Intern**
CSN Mineração | 08/2024 - 11/2024

- Optimized **SQL** queries (tuning) and monitored the health and performance of production applications.

**Systems Development Analyst**
CLI Consultoria | 03/2024 - 07/2024

- Optimized **RESTful APIs** for real-time data consumption in critical systems, focusing on low latency and availability.
- Developed **middleware** to orchestrate and transform data between **SAP** and **Salesforce**, evolving legacy code.
- Contributed to the evolution of the architecture and the scalability of applications.

**Software Development Intern**
CLI Consultoria | 02/2023 - 03/2024

- Built data ingestion routines from APIs, **MongoDB** databases, ERPs (SAP, Winthor) and CRM (Salesforce).
- Maintained and optimized existing data pipelines, including legacy code, improving the performance and reliability of data flows.
- Administered **Linux** servers in an **AWS** (EC2) cloud environment, following DevOps practices.

## PERSONAL PROJECTS

**Arena — Magic: The Gathering League and Tournament Manager** github.com/rodrigoacs/arena

- League and tournament manager for Magic: The Gathering with **Vue 3**, PrimeVue and Tailwind on the front-end and an **Express 5** + **PostgreSQL** API, featuring JWT authentication, round pairings, rankings with tiebreakers and a public league page. Containerized with Docker and Nginx.

**Mercadia** github.com/rodrigoacs/mercadia

- Financial terminal and collection/deck manager for Magic: The Gathering. A **Node.js/Express** + **PostgreSQL** back-end streams Scryfall's bulk data and collects LigaMagic prices through web scraping (Cheerio), secured with JWT, Helmet and rate limiting. Vanilla JavaScript front-end, installable as a **PWA**, with Chart.js charts. Containerized with Docker.

**Librishelf** librishelf.com · github.com/rodrigoacs/librishelf

- Personal library to catalog and track book collections, with **Vue 3**, PrimeVue, vue-i18n (Portuguese and English) and Chart.js on the front-end and **Express 5** + **PostgreSQL** on the back-end, with custom migrations, JWT authentication in httpOnly cookies, cover processing with sharp, transactional emails (Nodemailer) and tests with **Jest** and Supertest. Deployed with Docker Compose and Nginx.

## EDUCATION

**Bachelor's Degree in Information Systems**
IFMG, Ouro Branco - MG, Brazil | 09/2021 - in progress

**Technical Diploma in Mechanics (integrated with high school)**
IFMG, Congonhas - MG, Brazil | 01/2018 - 04/2021

## SKILLS & TECHNOLOGIES

**Programming Languages:** JavaScript, TypeScript, SQL, Java, Python, Kotlin.

**Back-end:** Node.js, Express, REST (RESTful) APIs, JWT authentication, microservices, ETL, systems integration (SAP, Winthor, Salesforce), Design Patterns.

**Front-end:** Vue.js (Vue 3), HTML5, CSS3, Tailwind CSS, PrimeVue, Bootstrap, Chart.js, PWA.

**Mobile:** React Native (Expo, Expo Router).

**Databases:** PostgreSQL, MySQL, Oracle, MongoDB.

**DevOps & Cloud:** Docker, Docker Compose, Nginx, Git, GitHub Actions, CI/CD, AWS (EC2), Linux (Debian, Ubuntu, CentOS).

**Quality:** Automated testing (Jest, Supertest), Code Review.

**Methodologies:** Agile, Jira.

**AI & Messaging:** OpenAI API, WhatsApp chatbots.
